for test

Feed back

From test, it was observed that most of students are slow learners. So It was decided to start basic course for 15 days so that students are able to learn topics of their respective classes. This message was circulated among staff.

Feedback —

Survey was conducted. It came to notice that mostly students came from rural areas and have poor economic status. It was decided to develop book bank. Many teaching members donated books to the book bank. Sweater distribution program was organized to distribute sweater to needy students. It was suggested by principal ma'am. This should be a continuous activity so that more & more help can be provided to these students.
